

vistār is a software application that helps farmers to get direct access to market or buyer information so that they can sell their crops at optimum prices.

vistār offers market information to the farmers on:

- improving buying and selling service by offering crops to potential buyers at the beginning of the season
- Centralizing bids and offers
- it reduces costs and improves margins for farmers

Features of vistār include:

- Ease of selection of crops from multiple reliable farmers or sellers
- Farmers can sell perishable crops at fixed interval and avoid crop damages
- Farmers can contact buyers directly through sms or email
